

RATIO ANALYSIS OF DHAKA BANK BD LTD

May 5, in Bangladesh, our eminence is backed by quality products and services, Made Economic & Financial Analysis; Monitoring & Evaluation of.

Organization may fill the vacant position of the organization through giving promotion of the better performing subsequent lower level employee. More over if they fell any problem in performing his duty, the bank arrange training program for them. Dhaka Bank recruit people from both the sources depending on the position for which the recruitment will made. Another is maintaining a good relation with the customer of the bank. These are mostly customized training program. Project Analysis The financial performance analysis of Dhaka Bank is given below: Core Deposit Ratio Core deposit ratio is the ratio of core deposits to total assets. The Bank started its commercial operation on July 05, with an authorized capital of Tk. They are prepared by various ways through a systematic process. At this level, training programs are not arranged as frequently as it is arranged for the level of Assistant officer to Senior Principal Officer. In general, the higher the percentage is the better. The paid up capital of the Bank stood at Tk 2,, as on March 31, Capacity Ratio Capacity ratio is the ratio of net loans and leases to total assets. Performance review is followed by self -appraisal. I also planned to use some related books, some research papers which might help me to do this report perfectly. The equation is Interest Coverage Ratio: A ratio used to determine how easily a company can pay interest on outstanding debt. Securities over 3 months but not more than 1 year was 8. In short Term Deposit account the deposit should be kept for at least seven days to get interest. Urbanization and lifestyle changes concurrent with the economic development created a demand for banking products and services to support the new initiatives as well as to channelize consumer investments in a profitable manner. There is no pre-structure training schedule for the manager of the bank. In this chapter I will try to focus on the activity performed Dhaka Bank Limited for building performer. This is used because it is simple and quick. But this process has some significant disadvantages: The factors and degrees are sometimes vaguely defined. As the vice president work independently in a prescribed constrains, the vice president gather experience through practice. Previously only government banks were here to serve the financial needs of consumers, but now varieties of services are offered by commercial banks which were not possible before. The figures used to calculate the ratio are taken from the company's balance sheet. Securities with maturity over 5 years rose from The equation is Expense Control Efficiency: It indicates the portion of revenue after the operating expense is deducted. Complete knowledge, speed and problem solving capabilities are judged. This policy usually used by the organization for various purposes like this is cost effective, motivate the employee, give the employee a growth opportunity etc. After joining in Dhaka Bank Ltd.
